SKILLS

Analytics & BI: Tableau, Power BI, Advanced Excel, Power Query, VBA, KPI Reporting, Interactive Dashboards, Scorecards, Operational Analysis, Variance Analysis

SQL & Data: SQL, Window Functions, JOINS, Subqueries, CASE Statements, Aggregations, PostgreSQL, ETL, Data Transformation, Data Quality

AI & Automation: Python, Generative AI, RAG, LLM Applications, NLP, Sentiment Analysis, Workflow Automation

Business: Customer Experience, Process Improvement, Stakeholder Management, Executive Reporting

EXPERIENCE

Research Assistant

University Park, PA

Penn State Center for Social Data Analytics

August 2025 – August 2026

- Built Python and SQL workflows for FreeFoodMap, a PostgreSQL platform with 890+ locations, while also supporting large-scale applied AI research.
- Used window functions, JOINS, subqueries, CASE statements, and aggregations to clean, transform, and validate data.
- Developed RAG, LLM, NLP classification, and sentiment-analysis workflows and worked with data from 3,300+ public meeting videos and transcripts.
- Added AI into FreeFoodMap to find new locations, validate information, and recheck existing records for changes or errors, reducing manual review.
- Built data-quality and model-evaluation checks using duplicate detection, validation rules, F1 scores, confusion matrices, and error analysis.
- Worked with professors and project teams to turn business and research needs into data requirements, workflows, platform features, and reporting logic.

Development Strategy and Operations Analyst Intern

McLean, VA (Hybrid)

Hilton Inc.

May 2024 – May 2025

- Built interactive Tableau dashboards, Excel reporting models, scorecards, and recurring reports used by leadership to track operational, financial, and development KPIs.
- Created dashboard views by brand, region, market, development stage, ownership structure, and pipeline status using Tableau calculations, filters, and functions.
- Automated recurring reporting in Excel and Tableau using formulas, Power Query, VBA, and built-in calculations.
- Combined and validated data from Salesforce, Excel, STR, competitor reports, and internal sources, catching missing, duplicate, outdated, and inconsistent records.
- Compared forecast, budget, actual, historical, and market performance to explain changes, spot gaps, and support business decisions.
- Turned stakeholder questions into clear metrics, filters, reporting logic, and useful insights, and trained a new analyst on recurring reports and validation checks.

Customer Service Agent – Claims Reporting and Operations Support

Dammam, Saudi Arabia

Nagel Express – Aramco Project

December 2018 – August 2021

- Built recurring Excel reports to track claims, financial exposure, aging, deadlines, delays, workload for management.
- Reviewed logistics and claims data to identify high-risk cases, recurring delays, process issues, and financial exposure, including claims close to \$1M.
- Reconciled shipment, invoice, receipt, and case data to find missing records, duplicates, and inconsistencies.
- Worked with Aramco, customers, vendors, Finance, Operations, warehouses, and regional teams to investigate issues and move cases toward resolution.
- Prioritized cases based on value, urgency, age, and operational impact, and led regular discussions around blockers, ownership, and next steps.

PUBLICATION

From Miso to Tray-C: The Impact of Hedonic and Utilitarian Name Preference on Non-Humanoid Service Robots in Restaurants

ICHRIE Research Reports, Vol. 11, Issue 1, 2026 / First Author

- Proposed and designed a multi-phase study after identifying a research opportunity during an independent study; analyzed data from 213 participants using Likert-scale measures, paired mean-difference tests, and significance testing.

EDUCATION

The Pennsylvania State University

B.S. Social Data Analytics | B.S. Hospitality Management – Minor: Entrepreneurship and Innovation

August 2021 – May 2026

B.S. Biotechnology – Minor: Microbiology

January 2013 – May 2017
